

STATE OF THE ART HANGING SYSTEMS

COMMERCIAL MARKET / B2B

▶ ARTITEQ SPECIALIST IN HANGING

A good hanging system is essential for displaying art and giving rooms a stylish look. A system isn't just about hanging: a professional system brings the place to life, whilst the system itself remains subtly in the background. It provides the opportunity to very easily create a different setting and therefore a new experience.

Artiteq is for professionals and consumers who want to be sure of a flexible and safe hanging system for art, frames and wall decorations. As well as these installations and the accompanying accessories, we develop systems which allow you to display information convincingly and elegantly. Artiteq also offers accessible solutions for well-considered visual communication, such as signage for offices and premises; these solutions are amongst our customers' favourites because of their effect and ease of use.

The thing that makes a hanging system so interesting for organisations and companies is that it fits perfectly in the strategy of sustainable building management. The one-time investment in a hanging system yields many benefits. Consider the ease, the safety and the flexibility when changing content and more important still: the preservation of walls because they will no longer be damaged.

Artiteq is your partner in interior projects. You will find us in the educational sector, the healthcare sector and, of course, in galleries and museums. Our innovative hanging systems are also used in offices and within commercial environments, to make an impact with information and decorations. Whether you wish to hang pictures or display documents or drawings on the wall: Artiteq definitely has the perfect system.

PRODUCT SPECIALIST
HIGH QUALITY
INNOVATION & SERVICE

EDUCATION

solutions for classrooms and corridors in schools

OFFICES

help the (end) user to contemplate the different options

CARE SECTOR

solutions in line with sustainable building management

GALLERIES & MUSEUMS

reliable hanging and simple and fast changeover

Together, the rail (A), the hanging wire (B) and the hook (C) form the **PICTURE HANGING SYSTEM**.

Why a **PICTURE HANGING SYSTEM**?

- ✓ flexible wall decoration (always)
- ✓ ease of use (hanging with no drilling)
- ✓ sustainable building management (preserve walls)
- ✓ one-time investment & assembly

▶ EDUCATION PRACTICAL AND TIDY

In the education sector, the design of the walls changes regularly. This is logical given all of the beautiful artwork that is produced every day. That simply has to be seen!

The Artiteq Info Rail is the ideal display system for displaying drawings, cards, photos and documents on the wall in a practical and organised manner. It also helps to preserve the walls, because thumbtacks and tape are no longer needed. This means that the Artiteq Info Rail system is very user friendly, for both staff and pupils.

As well as the Info Rail, Artiteq offers other hanging systems, for flexible and sustainable wall design. Picture hanging systems, such as the Click Rail and Top Rail can be used to hang reading charts, posters and even whiteboards and bulletin boards, as well as all sorts of wall decorations. Artiteq is also your partner for media that support education; we can supply the entire range.

Artiteq offers a total solution for all your display needs in the education sector. One thing is for sure: it can be nicer and it can be better.

► **CLICK RAIL** BLENDS IN WITH THE INTERIOR

This university has opted for the Click Rail hanging system to liven up the walls of the modern building. By opting for this rail in the building, the walls remain intact (undamaged) and the users experience more flexibility and ease of use when organising the room. Replacing, moving or adding wall decorations now couldn't be simpler for anyone: easy and in no time.

▶ TOP RAIL TWISTER HOOK IDEAL IN THE CLASSROOM

The Top Rail hanging system is mounted next to a recessed ceiling and the rail therefore 'disappears' into the ceiling. The system is ideal for hanging reading charts and other panels that require a central and highly visible place in the classroom. The Twister Hooks are discrete hooks that can quickly and easily be clicked anywhere along the rail. This is very convenient and will also save time for the teachers. Teaching staff are delighted with this hanging method!

▶ INFO RAIL INDISPENSABLE HANGING SYSTEM IN SCHOOLS

The Info Rail hanging system allows drawings and other documents to be displayed on the wall in a tidy and well-organised manner. The one-time assembly means an investment for years. Another huge advantage: thumbtacks and tape can be left in the cupboard! This system allows you to very easily and quickly change the students' drawings and artwork. When this new primary school was built, the decision was quickly made. The Info Rail allows the design of classrooms and corridors to be changed year after year, whilst the walls remain fully intact and undamaged.

► PRESENTATION MEDIA CUSTOMISED

Artiteq also provides schools with whiteboards, bulletin boards, glassboards and other presentation media that support education. As we combine these media with hanging systems, you will receive a well thought-out total solution which takes the decoration of the building to the next level. This customised final result will keep you going for years. This definitely provides a solution when you wish to have the freedom to easily be able to change the decoration.

► OFFICES STYLISH AND PRACTICAL

The design of a new office will only be successful when the (end) user has a pleasant feeling when working there. How can that be achieved? By ensuring that the user's needs are fully met. It sounds simple and it is simple! With Artiteq's hanging systems.

When designing offices following a new-build project, or after renovation, it is important to think a couple of steps ahead. What properties must the room have and how do we make that room practical and stylish? It is a huge advantage when an office is designed in such a way that flexibility and ease are created for the (end) user. Artiteq's hanging systems meet these requirements and ensure that the walls are not damaged. Even when the decoration is continually being changed.

If the building is undergoing renovation with existing walls and ceilings, the Click Rail or Top Rail hanging system is a good solution. You could also opt for a concealed Artiteq system, where the picture hanging system is integrated between the wall and the ceiling. This creates a very calm and professional appearance.

Artiteq is also your partner in providing professional presentation media for offices, such as whiteboards, bulletin boards or glassboards. You can also count on Artiteq for hanging objects on partition walls, in open spaces or the provision of whiteboard films for interior projects.

► TOP RAIL AVAILABLE FROM THE CEILING

In offices, recessed ceilings are often standard. The availability of a picture hanging system is possible by mounting the Top Rail to the wooden side strip of the recessed ceiling. This Top Rail allows you to easily decorate the walls: the hanging wires with hooks can be positioned anywhere you wish on the rail. Change and move pictures or wall decorations as often as you please.

► CLICK RAIL BETWEEN THE WALL AND CEILING

In this office, the Click Rail hanging system has been chosen. This system is mounted to the wall and against the ceiling. Because of the rail's discrete, white finish, the hanging system blends in with the wall and ceiling. This inconspicuous effect is emphasised by the transparent perlon hanging wire which connects the picture to the rail almost invisibly. This gives a very calm overall effect.

► INFO RAIL SHARE AND DISPLAY DOCUMENTS

Presentation media, such as bulletin boards, whiteboards and glassboards, are part and parcel of a business environment. As well as these traditional media, the Artiteq Info Rail has become an intrinsic part of the office. Here the Info Rail is used intensively to share and display information and documents. It is easy to operate, helps you to create an orderly display and puts an end to the messy piles of papers on the corners of desks.

► **IMAGINE IT** magazines MODERN ROOM DIVIDER

The Imagine It magazines system is an eye-catcher within an office environment. As well as the system's practical properties for displaying and saving magazines, Imagine It is the most stylish way of dividing a department into different workstations. It is therefore not only a hanging system, but a valuable interior accessory in the modern office.

▶ HEALTHCARE SECTOR FLEXIBILITY & CONVENIENCE

There is no other sector where the atmosphere can have such an impact than in the healthcare sector. In this sector, interior and wall decorations are extremely important. Particularly in the healthcare sector, where residents and patients change rooms regularly, these hanging systems are an ideal solution due to the ease of use and flexibility.

In new build or renovation projects, Artiteq offers several solutions that fit in with the thinking behind sustainable building management. These solutions include wall and ceiling or integrated picture hanging systems. A wall and ceiling picture hanging system enables different objects to be hung on the walls without walls being damaged. The integrated picture hanging system can be integrated at the same time that walls or ceilings are installed. Choosing integrated hanging systems offers significant long-term benefits to the end user: ease of use, flexibility and no damaged walls. We offer systems that can be used in combination with a recessed ceiling and plasterboard.

As well as Artiteq's wall and ceiling mounted and integrated systems, the Info Rail is a bonus for every hospital room. New patients can easily hang their cards and drawings on this rail. It is a nice gesture and immediately makes the room more personal.

Artiteq goes beyond merely hanging pictures. For example, we also offer solutions for hanging magazines, signage, visual communication and (acoustic) panels.

▶ **TOP RAIL** INVISIBLE NEXT TO RECESSED CEILING

When decorating walls, large healthcare institutions or hospitals prefer to opt for variation through exhibiting the work of different people. The availability of a picture hanging system is then a perfect solution. This system allows frames to be hung, changed or moved very quickly and easily, without the walls having to be damaged each and every time. A Top Rail next to the ceiling or recessed ceiling offers all of these benefits.

▶ **SMART POCKET RAIL** DISPLAY OF EMPLOYEES' FACES

Many healthcare institutions have rooms where a lot of people come and go and where it is important to share specific information. The Smart Pocket Rail allows this to be done in a professional manner. The acrylic pockets are attractive and the content can be changed quickly and easily. This product is a perfect solution for the so-called 'face wall' (the display of the different staff in a department) in the waiting room of a healthcare institution.

► INFO RAIL QUICK CHANGEOVER OF CONTENT

There is a high turnover of patients in hospital rooms. Nevertheless, during his or her short stay, every patient will want to make the room their own. The Info Rail is perfect for this. Drawings, cards, photos and other personal documents can be hung and subsequently easily removed. Displaying documents in this way gives a much calmer appearance than the traditional bulletin board or adhesive tape stuck to the wall. Furthermore, there is a huge benefit in terms of ease of use!

► MAGAZINE RAIL AWAY THOSE PILES OF MAGAZINES

It happens in every waiting room: a pile of magazines that, over the course of the day, becomes more and more disorderly. The Artiteq Magazine Rail uses the walls to collate magazines and offer these to people in a stylish manner. This maintains the equilibrium in the room, whilst the various magazines brighten up the walls. The Magazine Rails add something original to every waiting room.

▶ GALLERIES & MUSEUMS SECURE & FLEXIBLE

Hang art in such a way that security is guaranteed and so that the artwork can be changed quickly and easily; an absolute must for museums and galleries. The professional picture hanging system provides a comprehensive solution: flexibility, ease of use and maintaining walls because holes do not have to be drilled each time. As well as the assurance that works of art and other wall decorations can be hung securely, the systems offer a professional method of presentation. For rooms with walls or ceilings which may not or cannot be drilled into, Artiteq has solutions in the form of partition wall hooks.

Where required, we offer a picture hanging system that illuminates pictures and frames. With the movable fittings, it is possible to illuminate pictures and other wall decorations with optimal, high-quality lighting. The flexible hanging system allows art to easily be changed or moved, meaning you can change your displays as often as you wish without damaging the walls.

Do you wish to hang heavy pictures that change frequently in a secure manner? We know everything there is to know about well thought-out anti-theft solutions in combination with our picture hanging systems.

► **CLICK RAIL PRO** STRONG AND ROBUST

Secure and flexible. Those are the two main reasons why the Click Rail Pro hanging system was chosen in this case. With a maximum bearing capacity of 50 kg/m, this rail can be used to hang heavy frames and pictures without problems being encountered. If required, it is possible to use hanging wires with self-locking mechanisms. This means that, on all counts, this system is a secure way of exhibiting pictures. Works of art on the walls can be changed over in no time.

► COMBI RAIL PRO LIGHT BEAUTIFULLY ILLUMINATED

This gallery chooses to illuminate all works of art hanging on the wall using the Combi Rail Pro Light. The Combi Rail Pro Light is a flexible picture hanging system which includes picture lighting. The hanging wires, which can be positioned wherever you wish on the rail, enable artwork to easily be changed over or moved. With the movable fittings, it is possible to illuminate the pictures on the walls of the gallery with optimal, high-quality lighting.

▶ CLASSIC RAIL⁺ SOLID AND ROBUST

The Classic Rail+ is a flexible picture hanging system with an open rail, allowing the system to be used in combination with rods. As well as the additional bearing capacity for heavier wall decorations, the use of rods increases the user's ease of use. That is because a rod can easily be moved along the rail. This makes changing the content easier still.

▶ PARTITION WALL HOOKS FLEXIBILITY

Partition walls are frequently used in galleries and museums to exhibit artwork. To maintain a wall of this kind, it is recommended that partition wall hooks are used to decorate the walls. Various types of partition hooks are available and they are easy to use. The walls remain undamaged and yet can be frequently used to exhibit different artwork.
