

DISPLAY IT LED FIXED

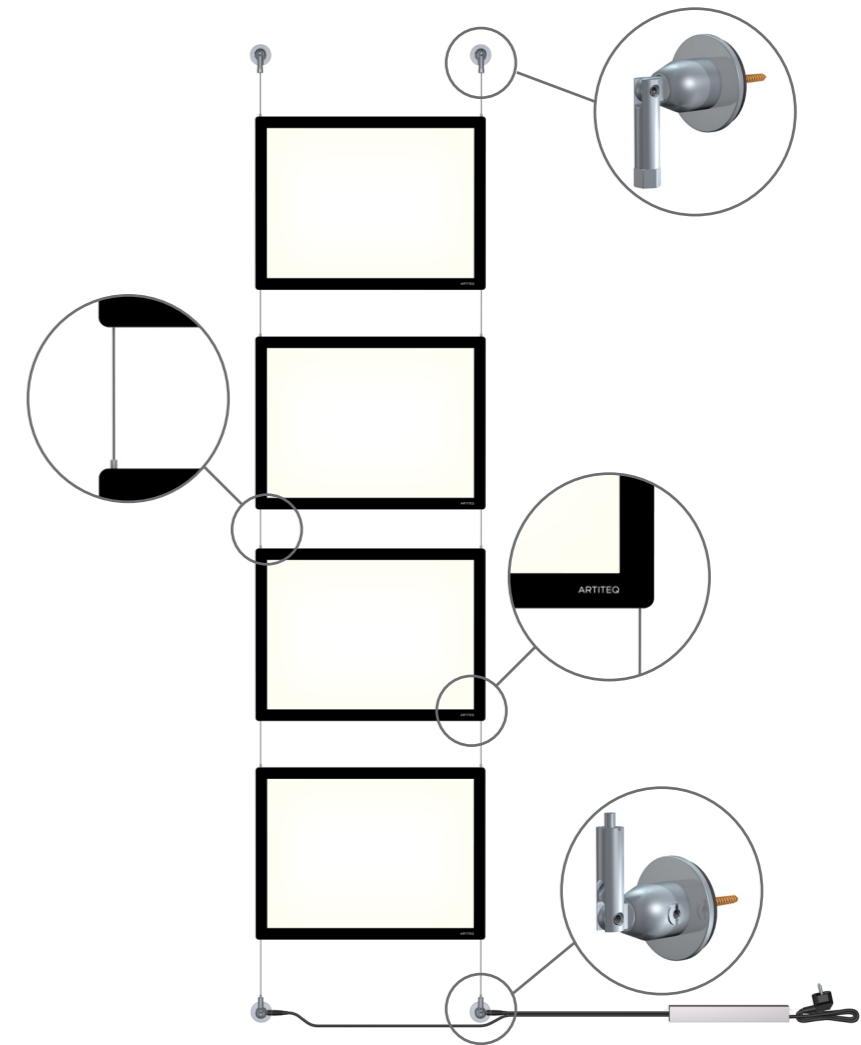

An eye-catcher on the wall

The Display It LED Fixed cable system is mounted to the wall or ceiling and because of the LED panels, this creates a striking display. Like the Flex version, the Display It LED Fixed can be used in display cabinets or in other places in a building. The content of the panels can be changed in no time.

The A3 and A4 LED panels can be used in either horizontal or portrait orientation and have clear LED lighting. The steel cables run through an auto-grip mechanism through the panels, connecting these together. This gives a professional, streamlined display and allows the height of the panels to be quickly and easily adjusted. This system allows double-sided displays: translucent paper can be inserted into the front and back of the LED panels.
